Title Index

Aerosol Evaporation in the Transition Regime, 25:11
Aerosolization and Hygroscopic Growth Evaluation of Lyophilized Liposome Aerosols Under Controlled Temperature and Relative Humidity Conditions, 25:22
A Field Study of Submicron Particles from the Combustion of Straw, 25:185
A High-Flow Turbulent Cloud Chamber, 24:59
Airborne Particle Excursions Contributing to Daily Average Particle Levels may be Managed via a 1 hr Standard, with Possible Public Health Benefits, 25:437
Air Flows and Particle Distribution Around a Rotating Grinding Wheel, 25:121
A Mathematical Model for Ultrafine Iron Powder Growth in a Thermal Plasma, 24:175
An Assessment of the API Aerosizer® for the Real-Time Measurement of Medical Aerosols from Pressurized Metered-Dose Inhaler (pMDI) Systems, 25:411
Ash Vaporization in Circulating Fluidized Bed Coal Combustion, 24:135
Axisymmetric Thermophoresis of Multiple Aerosol Spheres, 24:21

Behavior of Radon and Its Daughters in a Basement: Model–Experiment Comparison, 25:73
Bounded Logarithm Scale for Particle Count Data, 24:217

Calendar of Events, 24:57, 24:117, 24:231, 24:293, 25:90, 25:219, 25:358, 25:470
Comment on "Measurement of Aerosol Absorption Coefficient from Teflon Filters Using the Integrating Plate and Integrating Sphere Techniques", 24:221
Comparison of Thermal Rebound Theory With Penetration Measurements of Nanometer Particles Through Wire Screens, 24:129
Comparisons of Calculated Respiratory Tract Deposition of Particles Based on the Proposed NCRP Model and the New ICRP66 Model, 25:134
Computer Simulation of the Flow Field and Particle Deposition by Diffusion in a 3-D Human Airway Bifurcation, 25:338
Concepts in Inhalation Toxicology, edited by R. O. McClellan and R. F. Henderson, 24:291

Deposition of Aerosol Particles in Contraction Fittings, 24:205
Design and Testing of a Photochemical Aerosol Generator for Calibrating Aerosol Measuring Instruments in the Submicrometer Region, 25:67
Determination of the Fractional Efficiencies of Fibrous Filter Media by Optical In Situ Measurements, 24:161
Dielectric Force Calculation for a Cylindrical Fiber of Finite Length by the Energy Displacement Method, 25:174
Digital Signal Processing for Optical Particle Counters in Order to Improve the Signal-to-Noise Ratio, 25:399

Efficient Multiple Charging of Diesel Particles by Photoemission, 24:14
Elemental Carbon-Based Method for Monitoring Occupational Exposures to Particulate Diesel Exhaust, 25:221
Experimental Comparison of Four Differential Mobility Analyzers for Nanometer Aerosol Measurements, 24:1

Gas Collection Efficiency and Entrance Flow Effect of an Annular Diffusion Denuder, 25:113

Hygroscopic Growth of Assorted Indoor Aerosols, 24:151

Inertial Separation of Ultrafine Particles Using a Condensational Growth/Virtual Impaction System, 25:424
Influence of Air Pollutants in the ^{7}Be Size Distribution of Atmospheric Aerosols, 24:102
Influence of Particle Refractive Index on the Lower
